Concerning thoſe moſt Excellent

PILLS,

CALLED

Pilulæ Radiis Solis extractæ :

Being an Univerſal MEDICIN, eſpecially in all Chronical and difficult Diſtempers; as by the enſuing Diſcourſe will moſt clearly appear.

Truly and only prepared by me Lionel Lockyer, *Licenſed Phyſician; and by me faithfully communicated unto Mr.* Tho. Fyge *Apothecary, and Mr.* John Watts *my Nephew which reſides with me in my Houſe, and unto none other; from whom only, and from ſuch which they ſhall appoint, you can have this true Solar Preparation after my Deceaſe.*

Courteous Reader,

HAving through the Bleſſing of God, *(from whom alone cometh every good and perfect gift)* been ſo ſucceſsful in my endeavours, eſpecially in the Chymical Preparation of Minerals, which hath been found, and is generally

1470 f. 15

acknowledged by the most experienced Practitioners in all ages, to be most effectual for the extirpating and rooting out the ground of all Chronical Distempers, which, for the difficulty of their Cures, arising from the want of good Medicines, are generally the shame of Physicians.

Having, I say, (through his goodness) attained to the singular preparation of a Medicine thence, which for its excellent efficacy deservedly merits that Title; by which I would more peculiarly express, or give you to conceive by way of Analogy, of its excellent properties, which are of a *solar* nature, dispelling those Causes in our Bodies, which continued, would not only darken the Lustre, but extinguish the Light of our Microcosmal Sun: which however, that it may more perspicuously appear, I shall give you to understand its Medicinal Properties, which I in my self have experienced for confirmation of the same.

I cannot but commend this Medicine to all tender Mothers of children, which although they seem to be very lusty, yet are suddenly snatcht away by death, having the Convulsion Fits, and in this Distemper you may give to a child of a month old, the eighth part of one of these Pills in a little of the Mothers Brest milk; and after resting three or four days, you may safely give it the child the second time: but if in process of time it shall so happen that the Fits return again, you may increase the Dose, and give the child a little more then at the first time, and so continue as the childs body can bear, until the disease be totally vanquished, And here I cannot but pity the ignorance of some Physicians, which I have known in other Countries, that have given to an Infant new-born a Wine-glass full of water, with a little Pearl beaten to powder, or the powder of *Bezoar* Stone, which are Medicines of no virtue at all to prevail over such distales.

This Medicine is far more secure, safe and effectual, than all other Medicines whatsoever; for it resists and prevails against all the obstructions of the Spleen, which is the common Sewer or Scavenger of the body; as namely, for Melancholy, and also all obstructions of the Liver, the which unremoved corrupteth the Blood, from whence flow grievous diseases, as the continual pain in the head (the which causeth many a young Maid to descend into her grave, there being the vacuity of the course of Nature.) In Women the Suffocation of the Matrix, Suppression of the Monthly Flowings, Tremblings, Palpitations of the Heart, Swooning, Vertigo or the Head, and especially that hideous Torment, (in that part commonly called) the Mother; Feavers, Leprosie, Gout, Falling Sickness, Dropsie, Frensie, Vertigo, the Palsie, Rheums, Defluxions, Headach of all kinds, Convulsion-Fits, Difficulty of Breathing, Stoppage of the Stomach, Cough, Ptisick, Inflammation of the Lungs, Consumption, want of Appetite, bad Digestion, pain in the Stomach, Worms of all kinds, the Scurvy, Colick, Inflammation and Obstruction of the Liver, Corruption and Putrefaction of blood, Jaundies Black and Yellow, hard Swellings, Tympanies, Pain and Inflammation of the Spleen, Overflowing of the Gall, Tremblings of the Heart, Swoonings, Stoppage and Scalding of the Urine, Bloody-flux, Gravel and Stone in the Reins and Bladder, Rickets in children, Kings-evil, the *Gonorrhea* or Running of the Reins, the violent Hectick Feaver;

Agues

Agues Quotidian, Tertian, Quartan; Green-sickness; Fistula's, the Cancer, the Emerods and Piles, Stopping of the Terms and Whites. It exalts the Generative virtue, cleanses and strengthens the Spermatick Vessels, resists all foulness and infection in the act of Generation. It mundifieth and cleanseth the Skin, restoreth and increaseth Beauty, makes old Age comly and beautiful, and the countenances of all to be chearful and sanguin, and is an Antidote against infectious Diseases; although I have mentioned many Diseases, I might have saved that labour, for of all these and many other such like Diseases known and unknown, being without name or number, this Medicin is a full and effectual healer. The Pills may be taken alone; and if the Dose be precisely observed, the Operation will be almost insensible because it works so gently, that it is a Restorative to Nature, it restores the Radical Moisture, which is the Magazin of Life, and in a wonderful manner expels all that is noxious out of the body, and will not leave a sinister corner unswept in any part thereof.

It is a Preservative from all Accidents, as contagious Airs, for it stands Sentinel in the body, and will not admit any enemy of Nature to enter: if you increase the Dose, its Operation will be the more active and visible, exercising its Virtues upon the body by expelling the Disease; sometimes it works upward, and sometimes downward, and may be both ways at once: For it sweeps every hole clean, and carrieth away what thing soever is offensive or destructive to Nature. And according to the Dose, it works more or less, but always without any violence: I have seen it conquer many peoples Diseases in a very small Dose, and without any visible Operation.

It demolisheth and vanquisheth most, if not all manner of Distempers notwithstanding there are certain Infirmities which have been of long continuance, which have taken root as it were in the body, and these do require a more visible Operation, and cannot be expelled with a small Dose.

It is excellent against the Leprosie, and such like detestable Diseases where no part is found: there is not in the world a surer, safer, more efficacious and speedier Remedy, provided that Nature be not utterly spent in them that take it.

And as for that irksom and unclean Disease, so commonly called the POX, there is nothing more safe and sure, so that the Patient take it in a proper Dose: that is, he begins with two Pills, and so increasing one Pill every day, until he comes to six or seven, that he may sweat, and that the Medicin may have its Operation both by Vomit and Stool, and so continuing, without resting one day in a week, and the Cure shall be very well perfected upon him without any other means at all.

Now the great difficulty many men make in curing of this Disease, and the great charges they put people upon, make them slow, and ashamed to go to any for a remedy until they are almost rotten; which I know might be prevented, if the party at the first feeling of himself ill will take but one of these Boxes of Pills.

The Gout, Leprosie and Dropsie, are esteemed Diseases for the most part incurable

incurable; towards the cure of which and such Diseases, this Medicin is wonderful prevalent beyond credit, and it worketh in a short time more than any Medicin in the world ever did, for in a very short time it extracts from the whole body all turbulent, pestilentious, infectious humors, and that many times insensibly, and yet fully and perfectly, but often so mildly, that it is hardly perceivable; and so all true Cures should be wrought: it is not convenient (but destructive) to lay violent hands upon Nature; for all her ways are gentle and mild, and so should her Cures be.

And so in the cure of the Gout, though the wringing Pains thereof are intolerable, but it shall day by day hereby be a little mitigated and asswaged, the Fits every day decreased, and return not so frequenty as at the first, and gradually vanish quite away never to return again, which is a blessed riddance. They that are well, and desire so to be, let them take the Pills once in a Week.

Now all that take these Hills for the Gout and Dropsie, let them take three or four Pills every day. Many people of late after they have lost their Agues, have been very much troubled with the swelling in their Legs, which this Pill hath soon cured; and if they had taken it sooner, it would not only have cured the Ague, but prevented the Swelling in their Legs.

Also a most wonderful Operation it hath to produce Fertility or Fruitfulness in the most barren of Women, provided the cause be in themselves. This (Gods appointed time being not come) is able to withstand it. This Pill is very necessary for those that take long Voyages to Sea, as to the *East* and *West Indies*, in which Voyages, both the Soldiers and Mariners are much weakned and sorely troubled with the Scurvy, and have no Remedy with them, that can do them any or very little good; whereas this Pill will enable them to finish their journey with joy and comfort, both going thither, and also coming home, by the blessing of God.

Truly in the Universal Nature I have not hitherto found any Medicin near equal to this, by many degrees, which doth so effectually resist all Putrefaction both of Blood and Bowels; and this Medicin both Soldier and Mariner may carry, though never so far. It resists also all Obstructions, the prime cause of most Infirmities. Also it never corrupts, though kept an hundred years, which Drugs will quickly do, and lose both savour and virtue. But this, as I said and say again, is a sure Medicin, always at hand, easily administred and administrable: In the effects there is no Medicin in the whole world more healthful.

The Mariner who continues at Sea many months, and the Soldier in the Camp, suffring there all possible or imaginable inconveniences, cannot want, because this is a Medicin without a Plaster, it is in itself instead of a Plaster and will cure wounds or old Ulcers being taken inwardly, therefore Chirurgions in Ships, and they in the Camp, should take care to be provided with this one Medicin above all other; for by it they might preserve the lives of thousands of Mariners and Soldiers, which are under their care and tuition, and one only Ounce alone of these Pills, which is but a very small price, will make above an hundred Doses, and cure the sick with more facility than they can do otherwise by all their Art, though furnished with Chest fulls of Medicins; yet not

valua ble

valuable in comparison or competition with this. If Physicians or Chirurgions in the Camp or Navy, were provided but with some few Ounces of these Pills, they might save the lives of ten thousands, which miserably perish through want thereof. It is the duty of a General of an Army, to provide for the Soldiers under his Command, for when they are afflicted with the Plague, Scurvy, Fluxes, and other Epidemical Diseases, they fall like leaves in Autumn from the trees, or like flies in Winter, when the cold weather comes, they die by heaps for want of help, whereas this incomparable Medicin might save the lives, if not of all, yet the greatest part of them. For this very cause, and in commiseration of mankind, who is subject to so many casualties and infirmities, I will hereafter be sufficiently stored with this Medicin, which God hath blest my study and labors with, which many Rabbies have inquired for, and miss, and; now I publish it, that they which will, may make use of it. It is a Medicin so useful powerfull and precious, and yet not costly, that there is not the like.

A word or two to my kind Country men, that live in Country Villages far from Physicians or Apothecaries: When sickness comes upon them, their wives, children or servants, then for a *Gardus* Poset, and if that do it not, they are in a straight, and know not what to do; whereas if they had but one of these Boxes of Pills, they might do their family much good, and their poor Neighbours which are about them, if the Lord gave them hearts so to do: and in so doing, you shall manifest your selves to be like unto our Saviour Christ, of whom the holy Scriptures record, *That he went about doing good*, Acts 10. 38. And this is the practice of some Merchants in this City, and likewise some Gentlemen in the Country, which have many Boxes of these my Pills, to give away to poor people.

If any man shall imagine or presume upon my Commendation of this Pill, that therefore any Disease though never so inveterate may be removed, he is deceived, and in this doth err; for I speak here only of such Diseases as by natural means and Gods Blessing may receive and admit of cure, for in some cases the internal parts, the bowels, are so stuffed and obstructed with ill Humours, that no Medicin will prevail, in some their Lungs are rotten and putrified, and the Liver also, before they think of a Physician, or call for help. In such a case, what Physick can help or restore a principal member when it is quite lost, or make new bowels when the old are perished?

And sometimes it pleaseth God to strike a man immediately with a Disease which no man can heal, whereof divers examples are extant in the Word of God, as we may read of *Jehoram*, it is said, *That the Lord smote him in his bowels with an insurable Disease, and in two years his bowels fell out.* 2 Chron. 21. 18. Likewise *Jeroboams hand dried up*, 1 King. 13. And likewise *Gehazies* Leprosie, 2 King. 5, 27. Acts 12. 13. and such Diseases imposed by a Divine Hand, no human power can mitigate; only *Sauls evil spirit*, of a melancholy Devil, *Davids harp did mitigate*, but did not cure, 1 *Sam.* 16. 23. To God *all things are possible*, whose Hand can only help what the same hard harms; as *Miriam's* Leprosie was cured by the Prayer of *Moses*, Num. 12. 13. Hence it is to be concluded that some Diseases are Incurable, and there my Pill must needs fail: but in Natural distempers they fail not: For my part I take the Pills once every

Week, though I am not troubled with any Diſeaſe, only for my Healths ſake, and to prevent Diſeaſes, and I find much good by them, for about the ſixtieth year of my age, I felt ſome ſtifneſs in my Limbs, and in regard of my age, I was afraid I ſhould have fallen into ſuch a Diſtemper as I had twenty years ago, for then I was ſo lame (and nothing ſeen) yet in ſo much pain that I deſired death rather then life. But as God would have it, it parted from me, and as it came of it ſelf, I knew not by what means, ſo (by the Bleſſing of God) I cured my ſelf of that Diſtemper: that is I applyed my ſelf to theſe Pills, and by the Bleſſing of God upon them I was ſet at Liberty, and my Limbs were as nimble as they were thirty years ago; for now I can Leap, walk, or run, with eaſe and refreſhment, which before was a burthen to me; and I find them in my ſelf to be a great Reſtorer of Nature, for I have uſed no other Phyſick about this 12 or 14 years, and I intend to uſe them as long as I live, for I find that they ſtrengthen me very much, ever ſince I began to take them: and at this time (through the goodneſs of God) I am not ſenſible of any Diſtemper upon me: and although the Winter 1662, was cold and long, yet no Waſt-coat did come on my back, day nor night, which I had not gone without for thirty years before: One thing alſo in regard of my Age, makes meemarvel, that I am grown two inches bigger in my body within theſe twelve months.

I have alſo a preparation from the ſame matter of this Pill, with a little Addition to it, will cure thoſe that have been deaf many years, theſe Pills are to be taken as the other, and the price 5 *s.* the box,

And I'll tell you, as theſe Pills are Extracted from the beſt of Minerals, ſo they are the beſt of Medecins, and not to be made without great Expence, much Pains, Time and Operating in the Fire, the which is ſomething tedious now to me, being the 72 year of my age, only I am aſſiſted by my Couſen *John Watts*: I have lived in the Pariſh where now I live, theſe 18 or 20 years, and have wrought from Animals, Vegetables and Minerals; and although I have found ont many pretty *Experiments* from the two former, yet I affirm Experimentally, None like the Mineral Kingdom for Medicins; from which (through the goodneſs of God) I have gained this great Secret, which is the beſt that ever I knew, or care to know, nor do, or ſhall any know it, but them that I have Inſormed you of.

It is objected by ſome, that the Pill in ſome bodies doth not operate upwards and downwards, as ſome Phyſick uſually doth: yet my Pill, under God, though (inſenſible, it may be in ſome bodies) the operation may not be over in a day, or two or three after; It works by expelling wind, water and by ſweat and (if need be) in due time by Purge or Vomit, (if there be cauſe.)

Forasmuch as my Pill is well known through moſt parts of the World, to be a ſoveraign Remedy for any Diſeaſes, Seamen and Merchants (from experience) having communicated them almoſt into all parts; ſome there are that ſeek to counterfeit my Pill, which Pill they underſtand as well as *Walthams Calf*, for it requireth a better wit then lieth in any of their heads, to know the Materials, the Fire and the Water, the Order and the Time to be obſerved in making thereof; which I have not gained eaſily, but by long and chargeable experience: But if any of them be able to convert the blood of

the Serpent into a Salamander, able to endure a violent fire, and take from him his blood, soul, and spirit, and throw him headlong into the Salt Sea, that man shall be like another conquering *Jason* deserving great honour; but these deserve an ——— rather.

I understand also by some Persons, that there are great Disputes and Conjectures amongst men, what my Pill is made of, some say it is made of *Turpethum Minerale*, others *of Sulphur of Antimony*, and some say it is made of *Crude Mercury* or *Quicksilver*: but not one grain of either of these did I ever use to the making of my Pill. So much for the Negative. It matters not what it's made of, it being so safe and harmless, that women with child do safely take them, and much good they find by them, for they strengthen both them and the child. And I do conclude in the Affirmative, it is good for any Disease (as I said before) curable by Physick.

Now that none may be deceived for after time in buying Pills for mine which are not, I therefore first declare to all that shall read these lines, that the Pill was never taught me by man, neither do I know any man that can make them but my self. But since the Printing of my Book; *May* the 2. 1664. I have given my Secret to three persons, one of whom in regard of his Greatness I dare not mention, considering what *Solomon* saith, *The Kings wrath is as the roaring of a Lyon, but his favour is as the dew upon the grass*, Prov. 19. 12. The other two are, as I told you before, my friend, Mr. *Tho. Fyge*, and my Nephew Mr. *John Watts*, of whom, or of them they appoint, the right Pills can only be had after my death.

Now forasmuch as my aim in making this Medicin, was that all might have benefit thereby, I have so ordered the business that they are to be sold for me in several places of the Nation: but be careful to buy of those whose names are in my Book, I have done enough to keep you from being cheated both now and hereafter, if you are wise; if not I cannot help it. To prevent it if possible, I shall inform you that the great pretenders to know and make my Pills, are several servants that have lived with me, both male and female; now if these thievish servants had stole no more of my Pills, than they did of the way to make them, it had been some hundreds, if not more in my way; for they are as little skilled in the preparation, as an Horse is in Hebrew: And though every one of them make Pills different from one another, yet they will all assert they are mine, though never a one of them is so truly. The trick they have to vend them by, and put them off with, is that which takes only with simple folks, that they shall buy them cheaper of them; but it's dear enough that they pay, which take them with the loss of their lives, or sell them to the loss of their credit for them: for if there be an unskilful hand in such preparations, the best Medicin will degenerate into the worst and most pernicious.

I am informed they much desire my death, supposing that then they may cheat the world without controul; but I have ordered the business so, that you may be saved out of such Rooks hands, and buy for many years to come at mine own House, of my Nephew, such as I have taken care to prepare and provide for posterity when I am dead; they being better for being older.

In this Tract are preſented ſeveral Cures to your view, and a thouſand more might be added, but I need not have mentioned theſe, but to make ſome aſhamed of their belying ſo generous and general a Remedy, and becauſe they have been before now often Printed I ſhall give you the briefer Account.

Jane Newbury in the Pariſh of *Antony* near *Plimouth*, by a grievous Diſtemper in her head and eyes, at length became blind, was judged by ſeveral perſons, from whom advice was deſired, to be incurable; at laſt by the counſel of Mr. *A. F* Practitioner in Phyſick in the ſame Place, ſhe made uſe of theſe Pills and in a ſhort time found great amendment, and a little after a perfect Cure, and enjoys perfect Health and Sight. Octob. 19. 1674.

Edmund Herring's Child of St. *John*'s in *Cornwal*, being ſick and weak for a long time, was under ſeveral Phyſicians hands to little or no purpoſe, and grew into a Conſumption, as was judged paſt recovery; but at laſt they took themſelves to the uſe of theſe Pills for the Diſtemper, which had that happy effect as to reſtore it perfectly and is now a luſty lively Child.

John Blackelere Maſter of a Veſſel at *Plimouth*, having ſtrained himſelf by exceſſive labour, when his Veſſel was in danger of being over-let, had an extraordinary Tumor alſo afflicted him by means of it, for which he uſed many Medicins but in vain, till at length he uſed theſe Pills, which did compleat his Cure.

Balthazar Rawlings coming from *Newfound land* to *Plimouth*, was lookt on by the Doctor and Maſter as dead, and the Mariners were about to throw him over-bord; but ſome ſmall Symptoms of life remained in him; being put aſhore, he lay at one *John Fleetwood*'s Houſe in *Plimouth*, eight or nine days in a moſt deplorable condition, and at laſt fell to the uſe of theſe Pills, with the Operation of which he evacuated almoſt an incredible quantity of corrupt blood and putrid matter, viz. eight or ten times a day about two or three quarts, which made him a ſound man, and he went hence into His Majeſties Service.

John Langham in the City of *Exon*, having an Impoſtume gathered in his ſide, was left by ſeveral Doctors as incurable, he growing worſe under all their means, at laſt reſolved upon the uſe of Dr. *Lockyer*'s Pills, which did by degrees through Gods bleſſing make him perfectly well; the Operation of the Pills bringing away all the impoſtumated matter and the bag which did contein it, and much congeled Blood with it.

Arthur Fiſher of S. *Tho. Southwark*, cured of a violent Spleen, which had been his Companion for 30 years, and under all the means his friends and himſelf could obtain, could procure no help.

The Wife of Mr. *John Pitts*, late of *London*-bridg, Inſtrument-maker, being forc d to the taking theſe Pills as her laſt refuge for an exceeding gnawing pain in her bowels, upon the taking 5 of them voided in leſs then 5 hours by eſtimation 500 worms, and cleared of all her pain and her worms together.

Mr. *Cook*'s Child, a Tanner at *Rygate*, cured of the Convulſion Fits, after all hopes of Cure was paſt.

Mrs.

Mrs. *Anne Parsons* of *Muchwenlock*, cured of the Kings Evil; to the great wonder of all that knew her.

Elizabeth Munns wife of *William Munns*, of *Sheffield* in *Yorkshire*, having her breſt Cancerated to that degree that all the Phyſicians gave her over, yet for 10 *l.* coſt was Cured, and has ſince that a living Child, and does at this day giveſuck, and her breſt ſound.

Mr. *Barton*, 70 years of age, of the ſame place, with a dropſical tumour that fell into his Leg, was ſo very bad that the Chirurgeons could do no good on it, but at laſt came to this that the Leg muſt be cut off, or no Cure; yet after all, was Cured in a months time, and is at this day a ſound man.

Friends,

THeſe are to acquaint you, that in the year 1673. I was very much afflicted with the Stone, and the pain was ſo grievous that I could take little reſt, or walk upright for certain days, at length being perſwaded to make trial of Doctor *Lockyer*'s Pills, in the uſe of which, through God's bleſſing, the Stone diſſolved and came from me in ſmall ſtones and gravel, of which I voided an incredible number, part of which I have yet by me, to the number of near an hundred, but have loſt many more: I thought convenient to mention theſe things for the incouragement of ſuch as have like trouble, no more but reſt

Lyn, Feb. 19. 1675 *Robert Fawkner*,

Jacob Tyre at the *Oil-Mill* without *Lyn* South-gates, his Daughter having a dry ſore head for a long time, and uſed many Medicines to little or no purpoſe, only moſt of them would take it off for the preſent, but it would come again; at length they concluding it to be a ſcald, they went to one in *Lyn* who is a profeſſed Artiſt in ſuch Cures, but when the Artiſt ſaw it, ſhe would not undertake it unleſs ſhe might pluck off the hair, which the Childs Mother would not yield to, but followed the Child with the Pills as ſhe was directed, and ſo the Child received a perfect Cure in a ſhort time, and remains ſound to this day, and it is ſome years ſince.

John Gurten of *Woodham-Ferres*, *Eſſex*, after he had ſpent above 10 *l.* in Doctors and Phyſique, for the ſcurvy, wind-gout and wind-colick, being never the better, took *Lockyers* Pills, the firſt two boxes enabled him to go about, the ſecond two boxes made him perfect well.

John Day of the ſame Pariſh, was troubled with the Dropſie, Wind-gout and Sciatica for ſome years, and when he was confined thereby to his chair and as he ſaid, going into the ground, deſparing of recovery, becauſe he found no relief from the advice of his Phyſicians; was by four boxes of theſe Pills reſtored to his ſtrength and freed from pains, and continues ſo without any return thereof.

A Merchant of *Devon* troubled for twenty years with a bloody Water, was recovered of this ſad Diſtemper by theſe Pills, when he had ſpent many pounds on other means to no purpoſe.

A Gentlewoman of *Exon* through great weakneſs often miſcarried, and being perſwaded to theſe Pills when ſhe was with Child, found the happy

happy effect in going her out her time, and hath now a lovely child.

Mr. *W. Veal* Minister of *Edsligh* in the County of *Devon*, had a Child very sadly afflicted with the Kings-Evil, which was cured by these Pills, after many other means had failed.

Mr. John Warren Merchant in *Exeter*, was taken very sadly in his Limbs, so that he could not go, many means were attempted to no purpose, till he took these Pills; he was so weak, especially in his hands, that he could not button his doublet: but after he used the Pills, he increased in strength at this rate, that he could one day bear one pound weight, the second day two pounds, and so on every day proportionably increased in strength, and continues strong and well ever since.

I Think it necessary to give an accompt of the benefit I have received by God's blessing in the use of Doctor *Lockyers* Pills; I was sorely afflicted with a sore humour in my Legs, and I tried means to divert the same, but to little or no purpose, for by the means I used, all the benefit I received was this; the swelling would be asswaged in the morning, but would be as ill again before night, until at length being perswaded to take these aforesaid Pills, by which in short time I received a perfect Cure, and have remained more healthful ever since (for which I bless God) and it is now near three years since. I know also that the testimony given by *Robert Fawkner* is truth and shall be asserted by

Lyn this first day of the first Month 1678. *John Rice.*

One Hall of March, bought all the Pills I had, and he told me what a great Cure they had done to a Child of his four years of age, that was burstен, that he administred some of these Pills to it, and that he had perfectly cured his Child, and that it was very sound and well.

I had another of *March* that came to me yesterday, and he told me he had been with the King for the Evil he had on both sides of his neck, with three or four holes on each side, and he was willed by a friend to come to me for half a box of my pills, and in taking of them in one fortnights time, is perfectly cured.

Nov. 1. 1675. Your Friend

Godmanchester. *John Tyffin.*

Mr. Robert Havercamp's *Case stated by himself to me.*

Having received some wounds in the fleshy part of my thigh about two and twenty years ago, which were ill cured at first, it did with some intermission frequently break out and turn to a fistula, and this last Summer brought upon me a desperate lameness and pains to the very small of my Leg, together with a violent Feaver; and indeed I was even at deaths door: The Chirurgeons would not undertake it, unless I would consent to have my Thigh

opened

opened to the bone and pay forty pounds for a Cure; the latter whereof did startle me more than the former: So upon your Encouragement I made use of your Pills only, which by Gods help, did so vanquish the humour that fed the part grieved, and also all other Distempers Caused thereby, that in nine weeks I was perfectly recovered, and so continue, to the admiration of all that know me in that weak condition.

At *Salt-Ash* in the County of *Cornwal*, one Mrs. *Ann Bray* having her Lips Distempered with a corrupt bloud, for several years together: her Husband (being a rich man) made use of several Physicians, who drew from him at least forty pounds, but from his wife not the least of her Distemper, but being perswaded to the use of these Pills, was perfectly cured without the help of any other Medicin.

Also in St. *Stephens* by *Salt-Ash* one *Phineas Harwood* a Boy of seven years old was perfectly cured of the Kings evil, having nodes then fourteen Running Wounds on him (when he began to take them) and the Corruption that was wont to issue out of the Wounds, the Lad vomited up at his Mouth.

Likewise one *Thomas Skine* of the same Parish, was bruised in several parts of his Body, insomuch that he was very sick (as was supposed unto death) was perfectly cured by these Pills only, and that very suddenly.

One *Briget Axford* of the same Parish, being in a deep Consumption (as was generally thought) with the use of these Pills was perfectly cured, to the wonder of all her Neighbours, though they had no visible Operation on her Body in at least ten days after her taking them.

One Mrs. *Dixon* was troubled very sadly for two years at the least, with griping gnawing pains in the Belly, and by the use of these Pills and Gods blessing upon it, was cured: For before she had taken of my Pills six times she had a live Worm came from her by Siege four yards long. The Woman lives in *Deadmans Place* in *Southwark* near unto the Colledge-gate, her Age is about thirty four years, the Worm came from her the latter end of *May*, 1663 If any desire to see the Worm, I have it by me. She also voided another which was seven yards long.

I shall acquaint you of one Mr. *Tomlinson* at the Sign of the Golden Hat and Feather in St. *Olaves Street*, who had an Ulcer in his Head, which for three years time put him to great misery, and no small expence of money, in which time he had made use of Doctors and Chirurgions, but none could reach his distemper; but by the blessing of God, taking my Pills, they have done it, which is such a Cure that makes all men that know it wonder: for I think such a Cure can hardly be produced.

A Friend of mine coming into the company of a young man, who having the *POX*, made his Condition known to my Friend, who gave him but two Boxes of my Pills, and in three weeks time he was perfectly cured, although he scarce went to bed sober all that time: and within three weeks after he married a Wife, and both of them very well to this day. This was done in *December* 1662.

One

One thing more I cannot paſs by, to acquaint the World withal, Concerning a man in a very ſad Condition: For the firſt time that I came to him, I found him ſitting in a Chair, and his Legs laid up upon another Chair, and ſo full of pain that he was not able to riſe out of the place, but by the help of his Wife and Servants. He had kept one in his houſe ſome five months, who did adminiſter unto him, but in all that time he found no good; then he took one box of my Pills, and he took them from two to three, four, five and ſix, and ſo on, daily increaſing, till he took fourteen at one time, and in taking out the whole Box, they never gave him a ſtool extraordinary (as he thought) nor any Vomit, neither could he find himſelf one jot the better. Small encouragement (a man would think) to take any more; but I told him, if ever he were cured it muſt be by theſe Pills; then he took another Box, and whereas he took till he came to fourteen of the firſt Box, he could take of the ſecond Box but three or four, becauſe they then wrought ſo ſtrongly upon him both by Vomit and Stool; and then was the man in good hope of Cure. Well, he took a third Box, and before that was half ſpent, they broke him out all over his body into Scabs, and ſent out his Diſtemper with a *Pox*.

I ſet down this example to convince ſome perſons of their Folly, who have had ſome Diſtempers upon them many years, and they think by taking of my Pills four or five times to be cured, and if things be not preſently according to their expectation, neglect and ſlight them; not conſidering that a Tree, and ſo a Diſeaſe, that hath had a long time in rooting will require ſo much the longer time to root out again: But to all ſuch perſons I ſay I had rather they would let alone my Pills, and keep their Money and their Diſeaſes too.

Sir,

At *Camden* in *Glouceſter-ſhire*, I gave of your Pills in number eight, to a poor man afflicted with the Stone, and his Urine had been ſtopt for two days: In four hours upon their operation he had eaſe, and taking a Doſe every morning for a week many ſmall Stones and much Sand came away by Urine.

A woman who by the *Lues Venerea* had almoſt loſt her ſpeech, her *Uvula* being ſo ſwelled and the *Fauces* ulcerated, that ſhe could but whiſper, her feet and legs ſuffered pains like thoſe of the Gout; in the taking of a Box and half of theſe Pills, was reſtor'd to her ſpeech and quit of her pains.

Theſe with many more were communicated from one experienced in Phyſick.

The Wife of *John Wilſon* of *Bourn* in *Lincolnſhire*, was ſwell'd with Dropſie and Tympany as big as two women, and judged paſt recovery, was after two years illneſs cured by theſe Pills in a little time.

LETTERS.

Much Honoured Sir,

IN general I have found the operation of your Pills to be ſafe and admirable to remove ſuch infirmities as other Phyſick cannot reach; more particularly I have experience of their efficacy in mine own Family I my ſelf have been ſickly from my youth up, and have taken much Phyſick, but never any to be compared to them, for my infirmities increaſed and natural ſtrength abated yearly, till I met with theſe excellent Pills. The firſt occaſion of my taking them was an extreme Pain in my head of long continuance, I feared an Impoſtume, but after I made uſe of your Pills, I was ſoon freed from that pain, and alſo from divers other infirmities, my health and ſtrength renewed to the admiration of all thoſe that knew me formerly: I gave them to my younger Daughter, ſickly many years, we feared a Conſumption; to mine eldeſt Daughter, troubled with a Tumor in her Ear, the pain ſo violent that we feared either immediate Death or diſtraction, but through Gods bleſſing on your Pills, they were ſoon rid of their Infirmities. I gave them to my Wife, much ſubject to the Palſie, and great benefit ſhe finds by them. This good ſucceſs in mine own Family emboldned me to recommend them to many others who find them to be excellent in very many and great diſtempers and diſeaſes, both acute and chronical.

Your much obliged Friend
and Servant
William Hewſon.

Dublin, Dec. 17. 1664

Reverend Doctor,

I Thought good to give you a Relation of the rare effects of your Pills with us in *Ireland.*

A Servant of my own, *William Mathews* by name, my Steward, being abroad in my ſervice, was taken ſeven miles from home, with a violent Stitch in his ſide, ſo that being neceſſitated to ride a foot pace, was not able to ſtand ſtill nor ſpeak, but groaned in moſt terrible manner with pain: judging it to be a Pluriſie, I gave him four of your Pills, which gave him ſo much Eaſe, that he fell a ſleep, and after one hours waking gave him a Vomit, which eaſed him ſo much that he reſted well all night, and the next day roſe, and was pretty well.

To one about twelve years of age, troubled five years with a very great Belly extreamly hard, I gave ſome of your Pills bruiſed in White-wine, which wrought moſt upward, and ſometimes downward, and ſometimes operated no way viſible, yet in a months time brought the bigneſs and hardneſs of her belly down.

Another of my ſervants about *Chriſtmas* laſt became diſeaſed with a languiſhing Sickneſs, a hollow Cough, loſs of Stomack, fleſh and ſpirit, ſo that he could digeſt no ſuſtenance, and was in effect a dying man; I gave him ſome of your Pills, which before they operated made him ſo ſick, that he thought he ſhould have died, and about three hours after he vomited twice aduſt Melancholy and Choler; and making him ſome comfortable Broth he took it,

and

and thought he should have thrown it up as formerly he did all that he took, but it staid with him. Being very weak, and the weather extream frosty, I durst not give him of them often, yet when I though convenient, I gave him again and again, which wrought both ways with him, and most commonly what he voided upward was a glueterous substance, much like the stuff that comes from an old Ulcer, of a most ugly colour and great quantity, but in the end, with the Blessing of God in two months time he was able to ride, work, eat heartily.

Another of my Servants was taken with an Head-ach, and a pain in his left side, and all night both were so violent, that he was in a high Fever, I gave him three Pills, and about two hours after they gave him a Vomit, which took away much of his pain, and Fever away, so that he rested well that night; and the next day I gave him more Pills, which did not visibly operate; and the next day he was well.

A woman being troubled for two years with often Faintings and Swoonings, sometimes twice a day, sometimes once or twice in two or three days, was by your Pills cured, which brought up much Water, Choler and green stuff.

I have been my self troubled with the *Hypocondriack* Melancholy, and some time past, the effects have been very tedious and bad; I have these three months past once a week taken of your Pills, and find good by them and trust, with the blessing of God upon them, to live more healthful and comfortable then formerly.

I remain, Reverend Sir,

Dunbuan near *Dublin*. *Your Friend, R.B.*

Feb. 4. 1664.

Honoured Doctor.

HAving this opportunity, I thought to acquaint you with the effect of your Pills upon my self in reference to my distemper (which is the Stone both in the Reins and Bladder) I have taken them at times near two years, and I will assure you I did never take them, but they did bring away Stones or Sand or both from me.

Except one time that I took them for an extraordinary pain in one of my shoulders, which pain was so exceeding great, that I could not move my Arm to put on my clothes, neither did I take any rest for two or three days and nights: then I took five Pills (which is my usual Dose) and I could not perceive them to work any where else about me but in my shoulder, where my pain lay, and they did quickly give me ease and cured my shoulder. I seldom find any pain or heat in my back or reins, but if I take Pills, I am sure to be well quickly. Not long since I was taken with a violent pain in my back, on the left side, where I used to be pained with the Stone, which continued from *Monday* noon till *Thursday* morning, all which time I was in much pain: the *Thursday* morning about five of the clock I took five Pills, which in less than two hours gave me much ease, and I did perceive the stones move down into my bladder, where they did cause much pain some days; then I voided one great stone, as big and of the same form of a small filbeard kernel, it was so big

that

that when I saw the top appear, I was forced to pluck it out with my fingers and with it came many more less; that afternoon I voided above seven score and the next two days about forty more, since which I have felt little pain.

Sir, I shall onely say this, that according to my knowledge they have done many people good, but did never know them do any one harm.

Sir, this is all at present from him that is,

Windover June 5. 1665. *Your highly engaged Friend,* John Duncombe.

Noble Doctor,

I Have (with some small intermissions) taken your Pills these fifteen Months the necessity of my disease forcing me to make a full experiment of them. When I began to take them, I may truly say I was *deploratus à medicis*, having suffered much from divers learned and worthy men, without any success, besides the increasing of my Prison-diseases, which were *Scurvy*, *Dropsie*, *Wind-Gout*, (the last the worst and most tormenting) These complext and contrary Diseases, I laboured under for three years in my Prison, in which, what was administred against the one, brought and increased the other upon me. Sir, I intend not to trouble you with any large Discourse, I know it would be tedious, only in thankfulness to God, from whose influence and blessing alone depends the efficacy of every creature, and in due acknowledgments to you, I think fit to let you know, that by the blessing of God upon your Pills I am (as far as I know) perfectly cured of the *Dropsie* and *Scurvy*. When I began to take them my teeth were ready to fall out, and my gums festered like a galled Horse back, and I was swelled from head to foot. And as for my other tormenting Disease (the *Wind-gout*) though I cannot say I am perfectly cured of it, yet I bless God it is so mitigated, that it's tolerable, and though it do return upon me, yet holding on in taking your Pills, they always prevail against it, (though with great struglings) and it grows less and less. The manner of working these Pills is so various, that I believe none can promise how they will work three times together; sometimes by Vomit, sometimes by Stool, sometimes by both, sometimes by neither, but most constantly by Spitting, and ever concluding with the old Wives remedy for the Wind. The truth is, their operation is as if they were Rational rather than Natural Agents; what they find at present most annoying or threatning Nature, that they fall upon by affording and applying to Nature a succour and vertue against it. Sir, God has put a great honour upon you, in making you the instrument of bringing this rare Medicament into the World for the good of Mankind, the like to which I do not think hath been since the World began. Sir, I am bound to subscribe my self,

Tower, May 1. 1665. *Your very thankful and obliged Friend and Servant.* J. Downs.

Sir,

I Shall here declare what the goodness of God hath done for me by the means of your Pills; I had some nine or ten years ago taken, by means of my employment at that time, exceeding violent Colds one after another, which did occasion a wind and a water together in my flesh, at some times so such a pain, that I had no rest night nor day, but was so torn, that I could not contain my self from crying out many times in much bitterness, yet no swelling or any thing to be seen. I was so lame that sometimes I have been taken off from my employment six weeks, sometimes eight weeks, nay, sometimes more than ten or eleven weeks together. Then it pleased the Lord I heard of your Pills, and took the quantity of four or five Boxes of them, by which means I doubt not but there is perfect cure wrought upon me, besides some other inferiour distempers quite removed; so that through mercy, I am in very good health: I desire to give God the glory, and you thanks. So I rest

From *Martins Lane* in *Colchester*, *Thy Friend in love*,
April 10. 1665. Will. Pryer.

London, June 14. 1665.

Sir,

HAving had experience of the incomparable virtue of your famous Pills I have thought good in gratitude to give you an account of the benefits I have received by them about *August* last, by the persuasion of some friends seing me in a very sad and deplorable condition, having then been under the Doctors and Chirurgeons hands nigh twelve moneths for the cure of a *Fistula ana*, but found no help for them, but rather after much torture and despair my self ever to be recovered, I did procure a box of your Pills, which did to my admiration, within three weeks that I made use of them, take away the pain and cause of the Distemper, so that I was able to go healthfully about my occasions, and in *November* last, rid on horse-back three or four hundred miles.

Your faithful Friend and Servant.
Nich. Hudleston.

POST-

POSTSCRIPT.

I Being at my Brothers in *Lincolnshire*, his wife lay Bed-rid, and had so don for some moneths, the night before I came thither, her neighbours did nc expect she would live till the next morning; about a moneth or two befor she had her thighs and legs lanced and cut for the Dropsie, she having bee diseased six or seven years, and could get no cure; hearing some discour of your Pills, desired me to give her half a scere of them, which I did, an she making use of them, recovered, so that within a fortnight I had a Lett from my Brother for a Box of your Pills, with an account that his wife w then able to go about the house.

From the *Three Horse-shoes* near S. *Dunstans-Hill*. *Id. N.H.*

Friend,

I Have sent thee the mans own declaration of what thy Pill has done f him, he is an honest man, and hath spoken nothing but the truth; and for my self I was so lame with a pain in my huckle-bone for three years, th I went in much pain with a staff and with sore legs for twelve years, so tha I was in such misery, that I could not rest night nor day: and when I came thee first, I could not get on a shoe on one foot: and it broke out of my hi with a salt Rheum that I could not sit, nor lie down, but in such misery, th when I rose up from the place I either sate or lay down on, I thought m flesh would have come from my bones; but by the goodness of God upon t Pill, I am now in bodily health, and in my limbs. Under my affliction fo merly I could not go from my house a quarter of a mile without resting thr or four times, now I came from *London* in less than a day and an half. M wife remembers her kind love to thee.

From *Colchester* the 10th. of the second Moneth. *Thy loving Friend* Joseph Rieve.

My honoured worthy Friend,

MY first to you like the blind mans arrow, got me that which in twel years time hath for the present freed me of such a Distemper and Di ease, being the Scurvy and Dropsie, that all my Doctors skill, with much co and pains could not do, far beyond what I can express in Paper; ever bless be his name that taught it you, and you also for your love in sending me o Box and Book.

Ilchester, Septemb. 24. 1666. *Your ever thankful Friend and Servant*, John Lockyer.

Honoured Doctor,

THe good affection I bear to you upon the Repute of your Pills, oblig me to give you a demonstration of the names of some persons whic they have done perfect Cures on, and have also inserted the place of the Residence, as followeth, *viz.*

1. *Thomas Readshey* living at *Standly* in the County of *Durham*, dangerous ill of a shaking Ague, was perfectly cured.

2. *Margaret Farleſe* living at *Hedley-Hope*, extreamly ill at her Stomach, in very ſhort time was perfectly cured, and many Worms caſt up in her Vomit.

3. Mr. *Waſey's* Daughter of *Newlands* extreamly ill of a Fever, was by theſe Pills cured.

4. *William Wraue* living at *Billirow*, dangerouſly ill, and his body brought extream weak by bad Digeſtion and Melancholy, was with half a Box perfectly cured.

5. *George Barley* living at *Lowraw*, a Diſtemper came upon him ſo violently by drinking cold Water when he was extream hot with working, as no body thought he could live, with half a Box was perfectly cured.

6. *Henry Marchall*, near threeſcore and ten years of age, living at *Standley*, being extreamly troubled with a Tumor in his Leg many years, with taking half a Box was perfectly cured.

7. Mr. *Freſell* living in *Durham*, having ſuch a pain in his Bowels as the Phyſicians gave him over, was by theſe Pills perfectly cured.

8. *Jane Hedley* living at *Hedley Hill*, dangerouſly ill of a Fever, with a dozen Pills was perfectly cured.

9. *John Arrowſmith's* two Children living at *Cornſey*, were both perfectly cured, the one of the Rickets, the other of a Lameneſs in his Joints, which had made him a Cripple ſome years.

10. *Luke Harle* living in *Newcaſtle*, having been long and grievouſly troubled with a *Fiſtula*, though much helped by other means, yet was never perfectly cured until he took Doctor *Lockyers* Pills, which took away the very cauſe of his Diſtemper, and ſo is perfectly cured.

11. Mr. *Anthony Lorain* of *Walker*, very much perplexed with a violent Head-ach, with taking half a Box of theſe Pills was cured.

There are many which have been almoſt cured, and have found abundance of good by them, but I ſhall name none of them; and this I can onely ſay, I have heard of none that ever got harm by them.

From *Hedley Hope*, *Sir, Your humble Servant,*
Ian. 13. 1667. Charles Sanderſon.

One Mr. *William Hocknel* a Joiner in *Old-ſtreet, London*, having ſuffered four years lameneſs in all his Joints, and having ſpent the greateſt part of his ſubſtance on Phyſicians, and all to no purpoſe, at laſt fell to the uſe of this ſingle and ſingular Medicin; which in a ſhort time, to the wonder of all that knew him, reſtored him to his former health and ſtrength. Since which he perſuaded a Boy (whoſe name I know not) to take the ſaid Pills, (which Boy had been in *S. Bartholomews* Hoſpital for ſome moneths, and turned out as incurable) and in taking about four Boxes he was perfectly recovered. I ſhall refer you to the ſaid *William Hocknell* for a further account.

You my kind Country-men that deſire to uſe theſe my Pills, the Secret of which was diſcovered unto me by Providence for your good, be very careful to buy them of ſome of theſe perſons whoſe Names and Dwellings you find in this Book, and no where elſe, except you will be cheated. They are both made and ſold by my ſelf or my Couſin Mr. *John Watts* in my own houſe, and alſo by Mr. *Thomas Fyge* Apothecary, at the Sugar-Loaf without *Biſhopſgate*; from whom they are committed to be ſold,

Absalom because he had no Son to keep his Name, he erected a Pillar, and called it *after his own Name*, 2 *Sam c.* 18. *v.* 18. I have had Sons, but they are not, and so I shall call the Pill after my own name,

LIONEL LOCKYERS PILL.

Directions for the use of the Pill.

AS to the manner of its administration, it is so highly prepared, that it may very conveniently, as well as safely, be administred to any kind of persons, whether young or old, strong or weak, Infants new-born, or old men where Nature is much decayed.

Every one that makes use of my Pill, must use Discretion in the Dose, (and in that be a Physician to himself) and take or give it, as strength and the Disease require, and then the Patient shall not fail of his end or desire, nor the Administrer of credit and honour. The general Rules for its use are these. They may be taken at any time of the year, either in hot or cold seasons. They ought not to be taken upon a full stomach. Those which are not acquainted with the manner of their operation on themselves, should keep within, or warmer than usual when they take them first. They may be taken an hour after a slight supper, or none rather, or early in the morning, and kept after, if you will; or upon necessity, at any time of the day, as in Surfeits, and an hour or two before an Ague fit. To drink Posset-Ale with them when they work much, will be best, a draught of any other warm Liquor will serve the turn, though but small Beer; which need not be taken in three or four hours after, except they work sooner. He that takes of them onely for a Purge, and for once, may take about five at a time, which if bruised, and mixt with a little Honey or Wine, will scarce fail to answer his end. Those which take them for long Chronical Diseases, may begin at two, and so proceed daily to increase the number by one in a day, to seven, eight, or nine, or stop sooner, and take them whole as they be, which way they strengthen most, or beat them to powder, if they would have them to evacuate much. To children one Pill is enough for once, or two at most, and to weak children half an one may serve.

To secure the true Preparation in the hands of faithful and intelligent persons, I have given my Receipt to *Mr. Tho. Fyge*, in which I had no other design but the publick good, as I have many years declared; as also to my Nephew *Mr. John Watts*, Operator in my house, from whom you need not doubt of the true medicine, and all other pretenders to the knowledge of it, I disown and protest against, for all their living with me; and he that takes any Pills but of *Mr. Fyge* and *Mr. Watts* after my death, is deceived; for they onely know its due and true Chymical Preparation. The Pills are made up in Latten Boxes, and sealed with my Coat of Arms, and after my decease to be also sealed with the Arms of *Mr. Fyge*, to prevent counterfeits; and he and my Nephew may take what other course they will for that purpose. The price of a Box which contains about an hundred, a few more or less, according to their bigness, is 4*s.* and half a Box is 2*s.* and no where to be had but where the Book directs you.

ADVERTISEMENT.

SInce the decease of Dr. Lockyer, *to prevent deceit and mistake, all the Boxes of Pills are wrapt up in white Paper, and sealed with his Coat of Arms, viz. three Boars heads, and the Arms of* Tho. Fyge, *which are the six Flower-de-Luces and three Spur-Rowels; and in the papers are writ the names of* Tho. Fyge *and* John Watts, *by which means you may know his from all others: they are now sold by wholesale and retail, by* { Tho. Fyge *at the Sugar-loaf without* Bishopsgate, John Watts *in S.* Thomas Southwark.
